

Californians and Their Government

September 2022

Time Trends – Likely Voters

Methodology Note:

Findings are based on a survey of 1,705 California adult residents with 75 percent interviewed on cell phone (1,275 interviews) and 25 percent interviewed on landline telephones (430 interviews). Live landline and cell phone interviews were conducted in English and Spanish according to the respondents' preferences. The sample included 567 respondents reached by calling back respondents who had previously completed an interview in PPIC Statewide Surveys in the last six months. Interviews took an average of 19 minutes to complete. Interviewing took place on weekdays and weekday nights from September 2–11, 2022.

The September 2022 sampling error for the 1,060 likely voters, taking design effects from weighting into consideration, is ± 5.4 percent. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact surveys@ppic.org
